Honoured Guests,

As the Member of Parliament for the riding of Niagara Falls—Niagara-on-the-Lake, I am pleased to welcome everyone attending the Tesla Energy Institute Future International Conference, hosted by the Tesla Energy Institute from November 3 to 6, 2026.

The City of Niagara Falls is an ideal location for this conference, given the profound historical and technological contributions of Nikola Tesla to the Niagara region and to the development of hydroelectric power worldwide.

Tesla's alternating current induction motor, which was licensed by Westinghouse, was a major design feature of the Canadian Niagara Power facility within Niagara Parks. Today, visitors from around the world can explore this remarkable legacy at the Niagara Parks Power Station, where the innovative technologies and engineering principles that helped revolutionize the hydroelectric industry are celebrated and preserved.

This conference provides an excellent opportunity for local, national, and international experts to gather in Niagara Falls, Ontario, to exchange knowledge, share perspectives, and discuss advancements in hydro energy and related technologies that continue to shape our future.

I commend the Tesla Energy Institute for organizing this important event and for fostering collaboration, innovation, and dialogue on hydro energy and emerging technologies. Such efforts help inspire new ideas and strengthen partnerships that will contribute to a more sustainable and prosperous future.

I look forward to participating in the discussions and extend my best wishes for a successful and rewarding conference for all attendees.

Yours truly,

Tony Baldinelli, Member of Parliament
